Patch applied to
Production Code

Commit changes in
local copy/Update SVN
repository
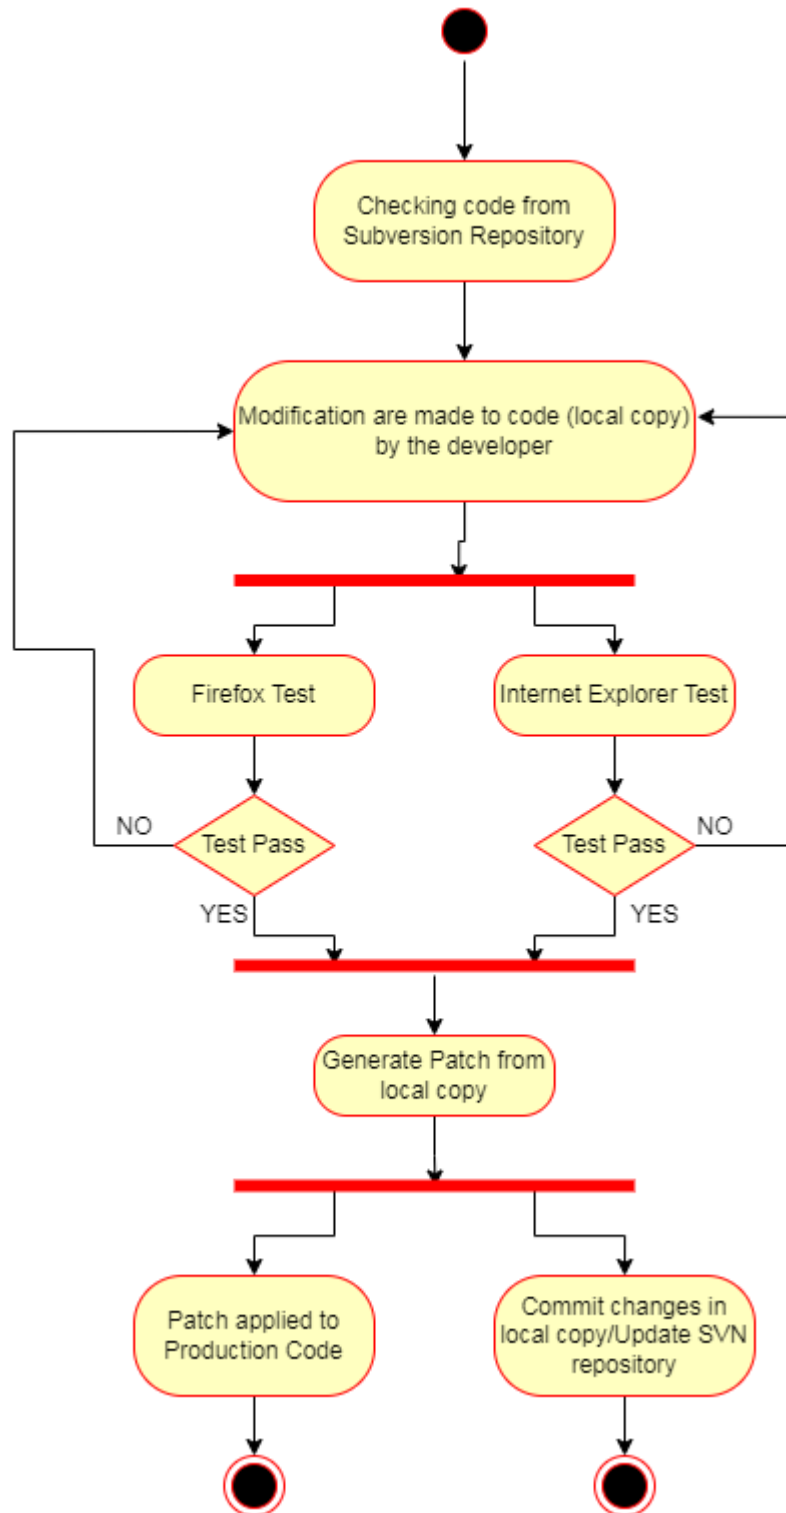

1. How would you represent testing of the application with multiple browsers?
    By using fork node
2. Can generation of the patch file and update the Subversion repository be done concurrently
    No, it cannot be done concurrently as the update to the repository can only be one after generating the patch file
3. Can patching the production code and updating the Subversion repository be done in parallel?
    Yes, as the repository is only updated after committing the changes to the local code.
